Professional Summary

With 2.5 years of experience in the computer-related industry, I am a customer-focused manager dedicated to contributing to organizational growth while advancing my personal career. Leveraging my skills and knowledge, I aim to enhance team efficiency and productivity to drive company profits. I excel in effective negotiations and upselling techniques, utilizing my organizational abilities to lead teams towards achieving outstanding sales results. I am now seeking opportunities to further develop my career in this dynamic field, where I can continue to apply my expertise and make meaningful contributions to organizational success

La Net Team Software Solutions Pvt. LTD Jan'22 - current 2023-2024

- Contact/Account Screen:
 - Ensure the screen provides a clear and intuitive interface for managing contacts and accounts.
 - Consider implementing features like quick search, sorting options, and customizable views for user convenience.
 - Filter:
 - Enhance the filtering capabilities to allow users to easily narrow down their search results based on various criteria such as name, location, industry, etc.
 - Implement advanced filtering options like date ranges, custom fields, and logical operators for more precise filtering.
 - Permission Component:
 - Strengthen the permission management system to control user access to different functionalities and data within the CRM.
 - Provide granular control over permissions, allowing administrators to define roles and permissions at a detailed level.
 - Custom Field Management:
 - Improve the custom field management feature to enable users to create, edit, and delete custom fields as per their specific requirements.
 - Consider supporting various data types for custom fields such as text, number, date, dropdowns, etc., to accommodate diverse data needs.
 - Media Manager Library with Upload for Local Storage:
 - Integrate a robust media manager library that allows users to organize and manage multimedia assets such as images, documents, and videos.
 - Enable seamless uploading of media files to local storage with features like drag-and-drop functionality, bulk upload, and automatic file organization.
 - Implement capabilities for users to preview, edit, and annotate media files directly within the CRM interface.
 - Refactor Existing Code:
 - Review the existing codebase to identify areas for improvement in terms of performance, scalability, and maintainability.
 - Refactor code where necessary to adhere to best practices, improve code readability, and eliminate redundancies.
 - Consider modularizing the codebase to promote code reuse and facilitate easier maintenance and updates in the future.
- By implementing these enhancements, I can significantly improve the functionality and usability of the CRMOne product, making it more competitive and valuable to users.

Megaminds Technologies PVT LTD, React Native and Flutter Developer July '01 – Dec '30 2022
